-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it exceeds 150 words and contains legalese language (i.e. "comprise"). Correction is required. See MPEP § 608.01(b).

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Double Patenting

2. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-50 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-50 of prior U.S. Patent No. 6,698,085. This is a double patenting rejection.

The claims (1-50) of the instant application and of US 6,698,085 (1-50) match verbatim.

Allowable Subject Matter

3. Claims 51-94 are allowed.

The following is an examiner's statement of reasons for allowance: Regarding independent claim 51, the prior art of record neither shows nor suggest a method of manufacturing a an EL lamp and membrane switch comprised of, in part, embossing the insulating flexible plastic film in a pattern comprising a serpentine spring member substantially forming a surrounding a frame element that is offset from the perimeter of the switch contact shunt electrode and permanently deforming the switch contact shunt and the insulating flexible plastic film to form a switch actuator surface bordered by the frame element, along with the rest of the limitations of the claim.

Due to their dependency, claims 52-94 are necessarily allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 5,950,808 disclose the state of the art for manufacturing EL displays.
